

Fixed monobeam spreaders

'Fixed monobeam spreaders are made in the Italy from steel and painted for indoor or out door use to our customers' specification. All our 'H' shape Lifting beams are made to order and therefore the design and lifting capacity can be modified to suit your individual requirements.

Fixed monobeam spreaders and Adjustable monobeam spreaders

MODEL ELSF

LIFTING BEAMS (FIXED POSITION)

Lifting Beams have single upper lift points that are well-suited to lighter, shorter span lifts that have a limited headroom requirement, such as in smaller manufacturing shops or storage

type facilities. Every Beam is engineered to be user friendly with the highest standards of safety and durability. The data table below lists the basic standard lifting beam offering.

- A wide range of sizes, dimensions, capacities and configurations are available upon request.
- Refer to the Beam Options on page 6 for additional accessories and capabilities.
- Beam profiles vary based on capacities.

MODEL*	CAPACITY (tons)	LENGTHS (L)** (ft.)	HEADROOM (HR) (in.)	LIFT BAILE*** W x H (in.)	WEIGHT**** (lbs. @ max. L)
ELS025	1/4	4-6-8-10	8	1.00 x 2.25	30

* Model Number Code: LB = Style (Lifting Beam), followed by capacity and then length.
 ** Lengths (L): expressed in a range of standard lengths available.
 *** Lift Bail: Lower Bail hole dia. per Crosby Shackle sizes by capacity.
 **** Weight: shown for the maximum length (L) in range.
 2000 lbs. = 1 Ton. 2205 lbs. = 1 (metric) tonne.

For dimensions and other requirements not offered here, please contact our knowledgeable sales team for a quick quote based upon the specific job application.

MODEL ELSBF

SPREADER BEAMS (FIXED POSITION)

Spreader Beams efficiently distribute the weight of a load between two lifting points and are effective at lifting loads with large spans where headroom is not limited. They add a measure of stability and are ideal

for lifting heavy duty loads. Every Beam is engineered to be user friendly with the highest standards of safety and durability. The data table below lists the basic standard, fixed position, spreader beam offering.

- A wide range of sizes, dimensions, capacities and configurations are available upon request.
- Refer to the Beam Options on page 6 for additional accessories and capabilities.
- The actual spread of the lower Lugs will be slightly less than the length of the beam.
- Designed for a 45° Sling Angle. 30° to 60° available on request.
- Complies with ASME Standards.
- Rigging available on request.

MODEL*	CAPACITY (tons)	LENGTHS (L)** (ft)	HEADROOM (HR) (in.)	LIFT BALES*** (hole dia.) (in.)	WEIGHT**** (lbs. @ max. L)
